Part 1 Continued

2. Description of how the organization is measuring progress towards its net zero or carbon neutral goal(s) and the ways the organization ensures it continues to meet the net zero and carbon neutral goal(s) it has achieved.

In 2022, Arch Capital Group Ltd. (ACGL) announced carbon reduction and net zero goals. We're committed to reducing our absolute Scope 1 and Scope 2 GHG emissions by at least 42% by 2030, from a 2020 base year. ACGL also committed to achieving net zero operations² by 2030 by purchasing carbon removal offsets for its remaining Scope 1 and Scope 2 emissions. Conducting annual greenhouse gas assessments and assessing our annual emissions reductions helps the company measure progress toward these goals. Our decarbonization strategy continues to focus on promoting energy efficiency measures within our global facilities, sourcing renewable energy through utility providers, right-sizing our office and data center portfolio to fit our operation's needs, and purchasing environmental attribute certificates.

ACGL has sourced carbon offsets since 2020. In our 2025 Task Force for Climate-related Financial Disclosures Report (<https://www.archgroup.com/wp-content/uploads/Arch-TCFD-Report-2025.pdf>) and our 2025 Sustainability Report (<https://www.archgroup.com/wp-content/uploads/Arch-Sustainability-Report-2025.pdf>), we state that we purchase carbon offset projects that undergo verification, auditing and certification from accredited organizations to offset our operational (Scope 1 and Scope 2) emissions. We further state that these certified offset projects help us to pursue carbon neutrality in our operations (Scope 1 and Scope 2), while supporting energy efficiency programs that, where available, benefit communities in developing areas.

² Note that our definition of operational net zero does not include Scope 3 greenhouse gas emissions as defined in the GHG Protocol. The term "operational net zero" does not carry the same meaning as "net zero emissions" as defined in the Science Based Targets initiative (SBTi) Glossary or any other framework, methodology, or other applicable publication. Additionally, our global goal is not a "net zero science-based target" as defined by the SBTi Glossary and is not aligned with the SBTi Corporate Net Zero Standard.

3. Information on greenhouse gas emissions.

3a. Has an independent third party verified your organizations greenhouse gas emissions?

No

3b. If you selected "Yes" above, please fill out the table below for all verified emissions data from the reporting year of the earliest net zero or carbon neutral claim to the present.

Emissions Reporting Year	GHG Scopes Covered by Verification	Name of Third-Party Verifier	Has the verifier's statement of verification been downloaded and saved?	Can a copy of the verification statement be publicly disclosed?

4. Information on science-based targets.

4a. Has your organization set science-based emissions reduction targets?

No

4b. Has your organization's targets been validated by the Science Based Targets Initiative?

No

4c. If you selected "Yes" above, please fill out the table below to describe the science-based targets that were set.

SBT Type	Pathway	Target Year	Date Target Published/Updated	Can a copy of the verification statement be publicly disclosed?	For Sector-specific SBTs		
					Did your organization use a sector-specific methodologies for this SBT?	What sector methodology was used?	Name of Independent Third Party Verifying SBT

Part 2

1. Verification of net zero and carbon neutrality claims with an independent third-party.

1a. Has your organization verified your net zero and carbon neutrality claims with an independent third-party?

No

1b. If selected "Yes" above, please provide below the name of the independent third-party verifier, the date of verification, and the statement provided by the verifier confirming that they have audited any claims.
